SUMMARY

Driven full-stack JavaScript developer specializing in MERN and modern backend tooling. Passionate about building scalable, high-performance applications using technologies like Next.js, Prisma, Drizzle, LangChain, LangGraph and Docker. Seeking opportunities to build production-ready applications and grow as a full-stack engineer.

EXPERIENCE

Frontend Developer Intern • Voyager IT Pvt. Ltd.

3-Month Internship | React.js | Kathmandu, Nepal

- ▶ Built and integrated an email service, improving user communication workflows across the platform.
- ▶ Developed and implemented a payment system, enabling seamless and secure in-app transactions for end users.
- ▶ Authored comprehensive API documentation, streamlining developer onboarding and cross-team collaboration.
- ▶ Designed and maintained reusable React.js UI components, contributing to a consistent and scalable frontend architecture.

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Zustand, Redux, Responsive UI, Framer Motion, Axios, Tanstack Query, Tanstack Table, Tanstack Form, RHF, Tiptap, shadcn, Zod

Backend & APIs: Node.js, Express, GraphQL, REST APIs, Redis, RabbitMQ, WebSocket

ORM & Database Tools: Prisma ORM, Drizzle ORM

Databases & Vector DBs: MongoDB, PostgreSQL, MySQL, Qdrant (Vector DB)

AI Integrations: LangChain, LangGraph

DevOps & Tools: Docker, Git, Vercel, Cloudinary, Multer

Soft Skills: Communication, teamwork, problem-solving, adaptability, time management

PROJECTS

LiveScore: [GitHub Link](#)

Node.js, Express.js, PostgreSQL, Drizzle ORM, WebSockets, Zod, Arcjet, Tailwind CSS, React 19, TypeScript

- ▶ A real-time multi-sport live score backend system supporting live match tracking, commentary streaming, and instant score updates.
- ▶ Built with Express.js and WebSockets to deliver low-latency live updates without constant HTTP polling, using PostgreSQL and Drizzle ORM for scalable persistence.
- ▶ Features subscription-based real-time commentary broadcasting, structured event-driven architecture, request validation with Zod, and optional Arcjet-powered abuse protection.

Image Gallery App: [GitHub Link](#)

React, Node.js, Express, MongoDB, Tailwind CSS, JWT

- ▶ Full-stack image gallery with complete authentication/authorization for secure personal gallery management.
- ▶ Includes social features such as liking and commenting on images for a community-driven experience.
- ▶ Provides dedicated sections for managing uploaded images ("My Images"), saved collections, and personalized content visibility.

WorkConnect: [GitHub Link](#)

React, Node.js, Express, MongoDB, Tailwind CSS, JWT

- ▶ A role-based job marketplace platform connecting local workers with job opportunities where employers can post jobs and workers can browse and apply.
- ▶ Features dedicated dashboards for Admins, Hirers, Workers, and Dual-Role users with customized access, analytics, and management capabilities.
- ▶ Designed to streamline local hiring, application tracking, and community-driven employment workflows through a responsive full-stack architecture.

E D U C A T I O N

BSc. CSIT (2026) • Tribhuvan University

High School (2019–2021) • Hope International Academy
